

Arda Demirci
Software Engineer

About Me

I am 21 years old and a senior student in Software Engineering. I have a strong foundation in web development, and I started this journey with Node.js. During my internship at IFS Turkey, I gained significant experience and worked on an e-invoice project, as mentioned in my work experience. Currently, I am specializing in ASP.NET Core and microservices, developing efficient systems with tools like Redis and Docker. My career goal is to design and enhance the architecture of systems in large-scale projects using microservices and advanced tools.
